Thanks Cory.

This is good to know.

Sorry Guy, I just saw your email. The sites are currently under construction with a targeted completion date of August 31. Deployment of the monitors should occur within 2 weeks following completion of the site construction. So, I would estimate mid-September for deployment and late-September for the actual start of operation.

Cory

I am sitting in on a briefing today on SO2 and someone might ask when the monitors will go out.
